

## Brill Formulation™ - Formula Control Kit

Feed Management Systems' Brill Formulation users can now take advantage of a package designed to meet their unique needs at a **special value price**.

### More Value

The new **Formula Control Kit** bundles all the functionality needed for automatic maintenance and control of formula data, with the increased control, flexibility and reporting for your change management needs.

Formula Control Kit Modules (click on the link to see Feature Sheet)	Features and Benefits
<a href="#">Plant Management</a>	<ul style="list-style-type: none"> <li>• An efficient method of maintaining unique formula specifications for companies with multiple plants and common formula specifications across plants</li> <li>• Save time in data maintenance, ensure data accuracy, ensure customer requirements can be met with plant overlay features</li> </ul>
<a href="#">Formula Verification</a>	<ul style="list-style-type: none"> <li>• Provides validation of production formulas and reporting needed for compliance</li> </ul>
<a href="#">Weekly</a>	<ul style="list-style-type: none"> <li>• Automates the weekly least-costing of all formulas reflecting new ingredient prices and nutrient values</li> </ul>
<a href="#">Formula Authorization Control</a>	<ul style="list-style-type: none"> <li>• Manage access to stored formulas and prevent unauthorized changes</li> <li>• Issue control allows you to update control numbers and dates of formula specifications</li> </ul>

Due to the substantial benefits customers can receive by owning **all** of these modules, FMS has decided to put these benefits into one kit at a **special value price**.

### How Much Can You Save?

If you purchased all of the modules individually, you would pay twice the cost of the new kit. Purchase the kit today, and we will give you 50% credit towards your order for any of the kit modules you currently own.

### Formula Control Kit Guidelines:

- You must purchase all the modules in the kit to receive the new kit pricing
- If you purchase the kit, FMS will issue you a 50% credit of the original price of any kit modules you may own
- Purchase the kit and your future Maintenance cost will be based on the new kit pricing
- This offer is valid only on current shipping and future versions of Brill Formulation in North and South America
- The kit is available at all user levels, and if you wish to increase users you will just pay the difference between the list price of the kit and what is currently owned to the new user-level
