

Brill Formulation - Multi-Blend™ – Complete Editions

How can you lower your ingredient costs?

Your purchasing ability is challenged by customer demands, ingredient variability and volatile pricing. You are under pressure to control your ingredient costs, lower the cost per unit of production and attract new customers.

Are you faced with any of these challenges today?

- Do you **manually** create models trying to “predict” future ingredient needs?
- Do you think you are **losing revenue** because market demand, price and available quantities are changing frequently?
- Do you struggle with how to best **optimize** ingredient quantities across multiple plants?
- Are you forced to guess as to what a **break-even price** might be when you have to justify using versus selling ingredients?

If you answered **yes to any of these**, then our Brill Formulation Multi-Blend solution can help you:

- simplify the acquisition and allocation of ingredients across plants
- reduce time in modeling changing scenarios
- quickly reformulate in aggregate and make selling decisions

The Value for You

Due to our Brill Formulation Version 2.0 release and the substantial benefits customers can receive by using all aspects of Multi-blend functionality, Feed Management Systems has packaged this value into new **Brill Formulation Multi-Blend - Complete Editions**. These new bundles are available in Standard and Advanced Editions **at a very special price**.

Brill Formulation Multi-Blend™ - Complete Editions

Standard Edition (click on the link to see Feature Sheet)	Features and Benefits
Multi-Blend Formulation	<ul style="list-style-type: none"> • Standard Edition is ideal for integrators or companies whose majority of total tonnage is made with less than 65 formulas • Production and purchasing decision tool that solves all formulas in the set simultaneously, taking into account the production tonnage values entered • Powerful optimization tool for allocating scarce ingredients and performing variety of “what if” scenarios
Multi-Blend Production Minimums	<ul style="list-style-type: none"> • Global production minimums may be applied to evaluate special ingredient purchases • Enable more accurate pricing of formulas that are ready for production
Multi-Blend Multi-Plant	<ul style="list-style-type: none"> • Optimize ingredients within a Formula set across multiple plants or purchasing region • Determine ingredient usage for the company based on tonnage values placed on each formula in each plant

<u>Multi-Blend Parametrics</u>	<ul style="list-style-type: none"> • Enables analysis of the effect of an ingredient price change over a given time • Analyze economic effect of the global change in an ingredient minimum or maximum restriction – key for purchasing personnel
<u>Multi-Blend Bin Allocation</u>	<ul style="list-style-type: none"> • Evaluates the greatest economic benefit in selecting which ingredients to purchase when the purchase exceeds the storage capacity of available bins • Bill allocation may be applied to entire formula set or each formula
<u>Multi-Blend Multi-Price</u>	<ul style="list-style-type: none"> • Allows users to enter multiple prices for individual ingredients in a multi-blend formula set • Can be used with Multi-Plant to assign prices within each plant

Advanced Edition (click on the link to see Feature Sheet)	Features and Benefits
<i>Everything in the Standard Edition Listed Above, Plus:</i>	
<u>Large Multi-Blend Formulation</u>	The 32 bit optimizer can access virtually unlimited amounts of memory and run an unlimited number of formulas in a matter of minutes

How Much Can You Save?

You may be paying up to twice the cost of the new Edition if you had to purchase all of the modules individually – so the Complete Edition provides you total functionality at a lower total cost of ownership.

For existing Multi-Blend customers, this is your chance to acquire all the functionality at a lower cost of ownership. If you purchase one of the Complete Editions today, we will give you 50% credit to be used toward your new order for any of the Complete Edition modules you own today.

Brill Formulation Multi-Blend™ - Complete Edition Guidelines:

- You must purchase all the modules in the Multi-Blend Complete Standard or Advanced Edition to receive the new Edition pricing
- If you purchase the Edition, FMS will issue you a 50% credit of the original price of any Edition modules you may own today to be used toward your new order
- Purchase an Edition and your future Maintenance cost will be based on the new Edition pricing
- This offer is valid only for Brill Formulation Version 2.0 in North and South America and is not available on previous versions
- The Complete Editions are available at all user levels, and if you wish to increase users you will just pay the difference between the list price of the system and what is currently owned to the new user-level
