

Feed Management Systems

Software Solutions for Feeding Our Growing World

Are you challenged with the complexity and time it takes to price and quote formulas today?

Are you finding it difficult to get the necessary inputs to ensure correct prices?

Feed Management Systems (FMS) can help you simplify pricing and ensure accurate quotes. The Brill Formulation solution offers Standard and Professional Quoting and Contracts modules that can provide flexibility and control when creating and tracking quotes. Both modules also give you:

1. increased capability for entering various margins, add-on costs, shrink costs, freight costs and discounts
2. templates allow you to meet the unique needs of each customer

FMS knows that quoting activities are critical to the profitability of any feed manufacturer. Therefore, we have made it more affordable for you to take advantage of these benefits!

Professional Quoting & Contracts

1. Future ingredient price deviations can be tracked by month.
2. Formula purchases can be booked by month, providing the ingredient buyer a summary of future manufacturing needs.
3. Quotes may be converted to contracts, allowing the user to track tons shipped, against tons booked.
4. Newly created type margins and previous formula margins may be combined in developing the quote for greater flexibility.

Standard Quoting

1. User-defined global pricing equations for use in quoting allow the creation of quotes quickly and accurately.
2. The module accommodates an unlimited number of customers, providing the ability to customize any quote to meet the unique needs of each customer.
3. Two quote options: Quick Quote creates a quote when no contract is needed and Advanced Quote for long-term purchases that can be converted to a contract.
